## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9, 11-25, 28-151, 153, 158-159, 164-165, 170-171, 176-177 and 182 rejected under 35 U.S.C. 102(e) as being clearly anticipated by Zdeblick '919.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 152, 154-156, 160-163, 166-168, 172-174 and 178-180 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zdeblick '919 in view of McKay.

Zdeblick '919 discloses in figures 1-14c a spinal fusion implant, substantially as claimed. However, Zdeblick does not disclose the bone promoting substance including bone morphogenetic protein, hydroxyapatite or hydroxyapatite tricalcium phosphate.

McKay teaches a spinal procedure comprising a bone promoting substance that includes bone morphogenetic protein (claim 11, lines 2-3), hydroxyapatite (claim 17, line

2) or hydroxyapatite tricalcium phosphate (claim 17, lines 2-3). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the bone promoting substance as taught by McKay could be substituted for the bone promoting substance disclosed by Zdeblick '010 because either bone promoting substance could be used to allow bone to grow through the implant and to the vertebrae to fasten the implant to the vertebrae. It is old and well known to form a spinal implant in a cylindrical configuration.
